VALVES NOT SEALING? HARD TO TURN?

- Val-Tex can provide all your valve maintenance product needs:
 - Lube sealants and lubricants
 - Valve Flush
 - Lube guns, fittings and adapters
 - Valve maintenance training

Founded in 1962, Val-Tex has grown to become the preferred provider of high quality valve maintenance products worldwide. Whether Val-Tex is assisting a major valve manufacturer or a utility in a small town, we take pride in helping our customers solve their valve maintenance problems.

VAL-TEX VALVE FLUSH

Val-Tex Valve Flush cleans out hardened sealants and lubricants that contain solids and/or fillers in all types of valves. This superior product is formulated using non-petroleum oils. Valve Flush does not contain acid, caustic, solvent, or solids to add to your problems. After Valve Flush has freed your valve, follow with Val-Tex lube sealants. They are free of solids and fillers and eliminate the need for products like Valve Flush.

- Does not contain acid, caustic, solvent, or solids.
- Biodegradable
- Non-hazardous
- Compatible with all lubricants and sealants.

VALVE LUBE SEALANTS & LUBRICANT

- Do not contain solid fillers like bentonite clay
- Provide lubricity for easier valve operation.
- Lube sealants available in bulk and stick with varying viscosities.
- Industry standard packaging
- Biodegradable (excluding 202 and 302)
- Most items in stock and available for same day shipping

The use of Val-Tex lube sealants and lubricant will help your valves seal better and turn easier while reducing your frequency of lubrication. The enhanced resistance of Val-Tex products to natural gas, liquid hydrocarbons (oil, gas, etc.) and other products will decrease the amount of product used. The superior formulation of Val-Tex products will reduce your valve maintenance labor and product costs.

The cost of training and implementing a proper valve maintenance program is a fraction of the cost of needless valve replacement. Valve maintenance training is key to your personnel understanding the proper techniques as well as the correct valve maintenance product selection. Contact Val-Tex or your Val-Tex agent for details.

VALVE MAINTENANCE TRAINING

- Training available from Val-Tex or your local Val-Tex agent
- Can include online, classroom and field training
- Can cover a range of lubricated valve types (ball, plug and gate)
- Details proper procedures and suitable products for your service conditions

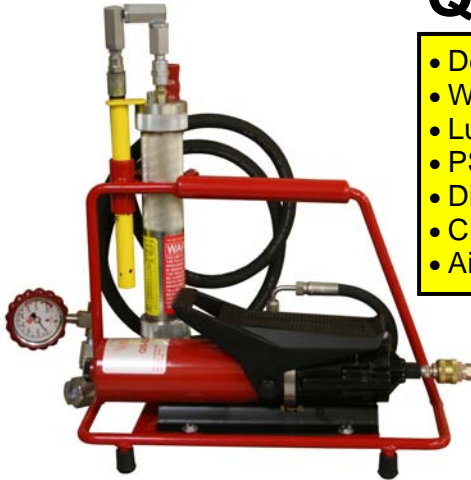

Valve Lubrication Equipment

QS-2000A

- Delivery: 8 oz./ 30-60 seconds
- Weight: 32 lbs.
- Lube Sealant Size: J, P, CT12
- PSI Rating: 10,000
- Dimensions: 20" H X 11" W X 17" L
- CFM Required: 9
- Air Pressure Required: 75-100 PSI

The easy to operate Val-Tex QS-2000A is a fast, affordable, compact, rugged lubrication unit. The lightweight QS-2000A is easily portable. The unit comes complete with a six foot, 3/8 inch I.D. high pressure hose, 15,000 PSI gauge, dual swivels, and a giant buttonhead coupler. It is suitable for use with J size lube sealant sticks, Lube Packs, cartridges, and Valve Flush.

QS-5000-C

The Val-Tex QS-5000-C is a compact, easy to transport, fast, versatile, heavy duty lubrication unit that will pump large volumes of stick lube sealant, lube packs, and Valve Flush. The QS-5000-C is quickly separated into two parts by removing the cylinder for easy loading and unloading by one person.

- Delivery: 8 oz./ 30-60 seconds
- Weight: 153 lbs.
- Lube Sealant Size: V, P-4, VF-GAL
- PSI Rating: 10,000
- Dimensions: 46" H X 20" W X 26" L
- CFM Required: 20
- Air Pressure Required: 75-100 PSI

QS-2200A

- Delivery: 8 oz./ 30-60 seconds
- Weight: 40 lbs.
- Lube Sealant Size: J, P, CT12
- PSI Rating: 10,000
- Dimensions: 20" H X 13" W X 17" L

The easy to operate Val-Tex QS-2200A is a fast, compact, and rugged lubrication unit. Run by a rechargeable battery powered hydraulic pump, the QS-2200A gives you complete mobility and eliminates the need for an air supply. It is suitable for use with J size lube sealant sticks, Lube Packs, cartridges, and Valve Flush.

1400

The Val-Tex 1400 is a rugged, light weight unit that is self priming and can be used in any position. The hydraulic system is equipped with an internal hydraulic relief and comes complete with sealant hose including 15,000 PSI, 2.5" 316 SS gauge and giant buttonhead coupler.

- Delivery: 1 oz./44 strokes
- Weight: 16 lbs.
- Lube Sealant Size: J, P, CT12
- PSI Rating: 10,000
- 1400-RECON exchange program also available
